

Eze fit Spring Clips Instructions

Included

- 2 x Bottom clips (fixed)
- 2 x Top clips (spring loaded)
- 4 x Gib fixings & screws

**Do not place mirror on hard surface
Ex tiles or concrete**

1/ **Fit two fixed bottom clips first.**

(this is the 2 smaller clips)

Securely fasten in desired position to wall.

(50mm -80mm in from each mirror side
or thereabouts)

If into gib wall & no stud use hollow wall

Fasteners & screws.

2/ Place mirror on bottom clips & pencil

Mark the wall at the top of mirror.

Remove mirror, position very top of clip

slightly below pencil mark. (2mm below)

Screw top clips securely to the wall.

(50-80mm in from each mirror side or
thereabouts)

(top clips are spring loaded)

If into gib wall & no stud use hollow wall

Fasteners & screws.

3/ Fit mirror, this is achieved by carefully

Pushing mirror up as far as possible

into the top clips , (maximum spring height)

Carefully lower mirror on bottom clips.
